

## **WE ARE HIRING ROLE - SENIOR TECH LEAD**

As a Senior Tech Lead, you will be working with product development teams focused on building a next-generation, enterprise, core wealth management platform for UK, US, and European clients, using cutting edge cloud-native technologies available today.

### **KEY RESPONSIBILITIES**

- Ability to lead multiple engineering teams (team comprises of 4-6 developers) and work with Product Owners, Architects and Test Engineers to design and build the WealthOS platform, focusing on both business features and non-functional requirements.
- Work with Architects to recommend, implement and enhance build+test best practices and coding standards.
- Participate in code reviews.
- Work in an agile environment and take full ownership of your work - this includes fixing what you break :)
- Stay up-to-date on the latest updates to your tech stack.
- Assist in recruitment, and engineering thought leadership within the organisation.

### **YOU MIGHT BE THE 'ONE' IF:**

- You have a collaborative, positive attitude - we are a close-knit team, and are looking for someone who will fit right in.
- You have spent seven years or more working as a developer in an agile environment, with at least three years or more in an team lead role.
- You have a strong proficiency in some or all of the following languages: JavaScript/TypeScript, Java, C++.
- You have a strong understanding and experience in microservices architecture, SaaS concepts, functional & non-functional testing, DevOps, CI/CD, cloud deployments, and infrastructure automation strategies.
- Experience in some or all of the following is a definite plus: building enterprise fintech platforms, hands-on development experience with Node.js, React, MongoDB, Redis, Docker, Terraform, APIs (REST, Web Sockets, WebHooks), and AWS technologies, such as Lambda, DynamoDB, CloudWatch, IAM, Route53, EC2, S3, API Gateway, SNS, SQS, SES, CloudFormation, and SAM.

**For the right fit, we're looking to offer a USD pegged, above-market rate compensation package with an option to own shares in WealthOS UK. We follow flexible hours, and have a hybrid working culture. We are an equal opportunity employer and value diversity at our company.**

## **ABOUT US**

At WealthOS, we are absolutely passionate about changing the fundamental nature of the wealth management industry through technological innovation. We believe that upgrading out-of-date, non-digital friendly tech will empower everyday people like us by giving financial security and equal access to high-quality wealth management products and services.

So starting with the UK, we are changing the wealth tech landscape and updating the industry by building an enterprise (B2B) wealth management platform. We are looking for passionate, curious and smart people to join WealthOS on this journey.

We are global; headquartered in the UK with the core product and engineering team in Sri Lanka, testing team in Russia, subject matter experts in the UK, and our first client targets in UK and Europe!
